## ***FCC Warning Statement***

---

This equipment has been tested and found to comply with the limits for a class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try and correct the interference by one or more of the following suggestions.

- Reorient or relocate the receiving antenna
- Increase the distance between the equipment and the receiver
- Connect the equipment to a different power outlet other than the one where receiver is connected
- Consult a certified television or radio technician

# **Chapter 1**

## **Preface**

This is a Preliminary version of the manual intended to provide advance information on the Addonics Technologies' external Slim CD-ROM drive. The information is as complete and as accurate as possible as of the publication date, but will be superseded and updated periodically by revised manuals. The contents are subject to change without notice.

## **General Information**

The Addonics Technologies' Pocket CD-ROM drive is a miniaturized CDROM drive that is designed for both PC and Laptop with PCMCIA, USB or Firewire Port.

## **Features**

- Multiple power alternatives; External AC/DC universal input adapter or Keyboard port adapter.
- Ultra light weight and compact.
- Connects to any PC via PCMCIA, USB or Firewire Port.

## **Physical Characteristics**

- Height: 22.70 mm
- Length: 163.26 mm
- Weigh: 137.20 mm
- Weight: 14.3 oz

## Chapter 2     Getting Started

This chapter will walk you through the installation of your External Pocket CD-ROM. Make sure that you have the following items:

### For CD-ROM with **Firewire Cable**

- Pocket CD-ROM Drive
- Firewire cable with 36 pin connector
- AC/DC adapter and PS/2 Power Cable
- This User Guide

### For CD-ROM with **PCMCIA Cable**

- Pocket CD-ROM Drive
- PCMCIA cable with 36 pin connector
- AC/DC adapter and PS/2 Power Cable
- PCMCIA driver diskette
- This User Guide

### For CD-ROM with **USB Cable**

- Pocket CD-ROM Drive
- USB cable with 36 pin connector
- AC/DC adapter and PS/2 Power Cable
- USB driver diskette
- This User Guide

## Chapter 3     Hardware Installation

**\* Note – Before you start**

- ◆ Since some notebook computers comes only with Four Pin Firewire port on the computer, they can use the BUILT-IN hub on Addonics Firewire cable to connect their Four to Six pin Male firewire cable.
- ◆ For Desktop Computer, No power is needed for CD-ROM Drive with Firewire Cable

## Firewire Cable Installation

Attach the FIREWIRE-IDE cable's "MC 36 Connector" (Picture 1) to your Addonics Pocket Drive firm and securely – you should not be able to disconnect the cable without pressing the release notch.

**Picture 1**

**\*\*\*Users can connect their Six Pin Firewire Cable  
Into the Daisy Chain Port to use the Drive as well. \*\*\***

## Power Source Installation

**Diagram 1**

## Firewire CD-ROM Installation

**Note: No driver required for MAC OS 9.0 or later**

## Chapter 4

### Playing Audio CDs

You can use the Addonics Pocket CD or Pocket CD-ROM drive to play regular music CDs.

- **To listen to the music from regular music CDs**, you will need to attach a headset or an amplifying speaker to the Audio Line Out at the back of the drive.
- **To play the audio music through the computer**, you will need to attach an audio cable (commonly available from any electronic store) between the Audio Line Out of the drive and the Audio Line In on the computer.
- You can also download the latest **Windows Media Player** to play audio songs without any additional hardware.

## Technical Support

If you need assistance to get your unit functioning properly, please call Addonics Technical Support. Our technical staff will be happy to assist you, but they will need your help to do so. Calling the technical support staff without all the proper information can be both time consuming and frustrating. Here are some tips to help you out:

- (1) MODEL NUMBER – Please have this number on hand.
- (2) SYSTEM INFORMATION – Type of computer, peripherals, etc.
- (3) OPERATING SYSTEM – What version of DOS/Windows
- (4) WHAT'S THE TROUBLE? – Give enough information  
About your problem so that we can recreate and diagnose it.

**FREE Software Drivers for all Addonics Technologies**
